

## ❖ Personal profile

Name :AMRO ABDULASALAM  
ABDULALLH ABDUL WAHAB Alkamail

Nationality :Yemeni

Place of birth: Taiz  
Birth of date :1994  
Gender :male

## ❖ Content

Email:AlkamaliAmro@gmail.com  
Phone:(+967) 775523818  
Location : Sharab Alsalam-taiz

## ❖ EDUCATION

B.S.  
Software Engineer  
Engineering &IT, Taiz University  
September 2013 - June 2019  
GPA: 2.5

## ❖ SKILLS Technical

Language program

- Java
- SQL
- APIs
- JavaScript
- HTML5
- CSS3
- Php
- C++
- python
- Node.js
- C\_Sharp
- C
- prolog
- VB
- Kotlin

## ❖ CAREER OBJECTIVE

Software engineer with a proven ability to work creatively in small and large team environments. For a team project, I was responsible for the back end, other work. look for an opportunity to use these skills in a collaborative environment with other passionate technologists creating delightful experiences for Motion Recruitment's end users, where I can help in the delivery of state-of-the-art software solutions. Experience includes coding, troubleshooting, and testing for my projects while company. Relevant skills include in the java, PHP, Data Structures, , and Debugging

Develop information systems by designing, developing, and implementing software solutions

Implementation and development of complete software

Troubleshooting and Troubleshooting

Update software first

Determine the operational feasibility of systems by conducting analyzes, identifying system problems, and developing appropriate solutions

Designing and creating programs and systems

Software development and improvement by studying the needs of information systems, consulting with users of the systems, studying systems flows, as well as using data, and working methods

Find the causes of problems

Experience with software and systems on hardware

Carry out maintenance and modification operations

Follow up on software development processes

Record and document all previously achieved solutions

Documenting graphs, diagrams, programming and coding processes

Protection of technical processes and software

Collect and analyze data and information about software and everything related to it Completing and completing engineering and organizational tasks software testing

Correct use of software engineering tools and equipment

Convert paper systems into electronic systems in order to save time and effort Computer software maintenance

Writing and preparing technical reports

Computer software and application design

Work on developing software, software and applications specifications based on user feedback

Define the operations and tasks that the software is required to perform

Skill programming

Problem solving skill. •

Architecture MVVM and MVP

-Attention to detail

-Communication skill

-Continuous learning ability

-information analysis

-General programming skills

-Software design ability

- The ability to correct software errors

-The ability to document software

-The ability to test software

-work as one team

- Possess the basics of software development

Know the software requirements-

## ❖ Language

Arabic :native language

English :very good

## ❖ WORK EXPERIENCE

Android Developer

Company Interactive System Technology Solutions

march 2020 -

.Solid knowledge of OOP, SOLID principles, most used design patterns.

.Good Understanding of clean architecture.

Deep knowledge of Java

Strong knowledge of Android SDK, different versions of Android, and how to deal with different screen sizes.

Familiarity with RESTful APIs to connect Android applications to back-end services.

Strong knowledge of Android UI design principles, patterns, and best practices.

Experience with offline databases (Room,Realm), threading, and performance tuning.

- designed and developed 15+ mobile applications use IDE android studio, based requirements, design specifications.
- Collaborated with 3 designers, 2 managers, and other developers across the project teams.
- Worked with Quality Assurance team to determine if 10+ applications fit specification and technical requirements.
- Developed back-end logic in Java to implement state-wide underwriting model
- Developed and executed 300+ test procedures for software components.
- Designed software solutions by analyzing system performance standards, increasing performance efficiency by 27%.

- Wrote 200+ unit tests to verify the functionality of user interfaces, back-end processing, connectivity, and relational database interactions
- Helped evolve front-end and back-end stack
- Assisted in developing and implementing systems architecture designs, patterns, and approaches
- Wrote structured, tested, readable, and maintainable code
- build apps using approaches Native, Cross-Platform, and Hybrid App Development

## ❖ PROJECTS COLLEGE

-Dynamic builder Form App

-Job portal Track app & website

Creator

- Developed and designed full stack Java application to display campus events with the application.
- Used Travis for hosting to facilitate open source contributions from other college students.
- Tuned and monitored application performance.
- Debugged and troubleshoot code related issues/defects to ensure application remained functional and 100% bug-free.
- Followed ARIA and A11y accessibility standards to ensure users with disabilities had highest quality UI/UX.

-Clinic system desktop

- Sale system desktop

-dictionary application java

## ❖ TRAINING& courses

-International Computer Driving License

-Preparing and managing Mikrotik network,ITC Institute

-Developer PHP and MySQL

-Windows server 12

-Cordova website

-REACT NATIVE

-Node.js website

#### SKILLS PRESONAL

-Creative Thinking

-Communication

-Time-Management

-Research

-Team Player

-Skill deal with computer and Internet by form excellent

-The skill of dealing with the android studio for development app

-Ability to work for long periods of time

-Sincerity and dedication to work and work in a team spirit

-The ability to communicate with others in an effective way easily and easily

-very well Ability to work for long periods of time
